# You YouTube

**YouTube** is the world's second largest search engine. 24 hours of video are added every minute. The site allows users to upload, view, and share videos. Available content includes video clips, TV clips, music videos, and other content such as video blogging, short original videos, and educational videos.

A few things that you can do without producing video content of your own:

- Comment on other videos of interest
- Create playlists of your favorite YouTube videos
- Rate videos
- Favorite Videos
- Watch tutorials to develop new skills:
  - Baking;
  - Playing the guitar;
  - Editing videos;
  - Learning how to use the iPad accessibility features.
- Watch tutorials for your everyday activities:
  - Changing the car oil;
  - Learning how to transfer from wheelchair to car;
  - Benefits advice;
  - Introduction to disability driving controls;
  - Learning what assistive technology is available.

Videos are very effective as they have the unique ability to deliver sight, sound and emotion, instead of pages of text based instructions.
